

Falls Church Planned Parenthood Transcript

“Pimp”: Live Action undercover actor

“Prostitute”: Live Action undercover actor

“PP:” Planned Parenthood manager “Marla”

Footage is marked by approximate video frame.

Some text is bolded for emphasis by transcriber.

Footage taken January 11, 2011.

Footage taken at Falls Church Health Center.

370 South Washington Street #300

Falls Church, VA 22046

19900

Pimp: Joe, Joe

PP: Marla, nice to meet you.

20200

Pimp: Is this confidential?

PP: Mhm.

Pimp: You're not able to disclose? OK.

Pimp: Okay. I've recently kinda been getting a burning sensation going on. Right. And I need to be tested. Uh, **where it gets kinda complicated is, uh, I'm involved in sex work.**

PP: Okay.

Pimp: Ok?

PP: Mhm.

Pimp: I believe I got it from one of the women that I manage.

PP: Okay.

Pimp: It could be her, or several of the other girls.

PP: Okay.

Pimp: And they will need to be tested as well.

PP: Right.

Pimp: But they also need other things just to be on the safe side. This is kinda something out of nowhere.

PP: Okay.

Pimp: Things like birth control,

PP: Mhm.

Pimp: Things to kinda keep them from catching STDs in the first place. i know you guys provide condoms.

PP: Right, condoms.

Pimp: but uh, I didn't know if there's anything else that was available to them

PP: Besides abstinence or condoms, there's really nothing else-

Pimp: yeah.

PP: To kinda prevent STDs.

Pimp: Okay.

22400

Pimp: Ok so I also have some girls. I'm not sure how they would need to come in here and be able to receive help or receive screening and things like that.

PP: Well we, I'm not sure if money is an issue, but we don't offer free services here. So, the best thing, I'm not sure.

Pimp: That's fine. We just need quality services we need to make sure that they're clean and good.

PP: Well as far as STD testing, they can walk in for that, depending on what they got, to get the full range of testing its up to 200 dollars. Gonorrhea and Chlamydia are the most common ones and that's \$80 for those two. Karen, I need a couple minutes. And then, so that's the common for those two G and C are the most common ones. HIV is the most accurate after 3 months. but if you're in that kind of work, then you probably want to be tested every 3 months or 6 months

Pimp: yeah, constantly, constantly

PP: and there's an Ora-quick(?) test that can be done for that, its a quick response test. and thats 40 dollars, you get the results in 20 mins.

Pimp: Really? And how accurate is it?

PP: It's just as accurate as the blood. It's 99.5 or something.

Pimp: Wow ok. Ok, we gonna have some other girls that need the birth control like I mentioned. And then, abortion services. Is that-

PP: We do all that here.

Pimp: Ok, that's all done here. Now we have some girls that, they do not necessarily have all the documentation. Some of them are from out of the country.

PP: We don't need any of that.

Pimp: Ok. And we have a couple of girls who are pretty young, about 14, 15, but they need to be safe as well. I need to make sure that they're safe. I'm not having them out there if they not gonna be safe.

PP: I mean, teens can obviously be a different issue, there's parental consent and everything in the state of VA and there's obviously statutory rape and issues as far as that goes, so that would be, we do require identification for [abortion services]

Pimp: Testing?

PP: A specific age. Testing, not necessarily, but abortion appointments you definitely need to have an ID.

Pimp: But like, for birth control.

PP: For birth control counsel, no.

Pimp: **What about the morning after, so**

PP: No, and that's over the counter, I mean, that's available at the pharmacy also.

Pimp: **Ok. Are you guys able to write a prescription.**

PP: We have written prescriptions, yes.

Pimp: How much would that be?

PP: It all depends on what they're given, ya know, what kind of method they choose. There's definitely generics out there that can go as cheap as 5 dollars or then go up to 50.

Pimp: Ok, so how best for the girls that, I mean, they gonna need help one way or another, they gonna need to make sure they can get testing if they need to get testing, to get protection if they need protection. How can they somehow still receive that even if they don't have all the legal... is there some way they can still get protection?

PP: We don't necessarily look at the legal status. Like I said, abortion appointments do require photo ID. It's nothing as far as records. It's just photo ID that's ever going to be required.

Pimp: So they could just come in and make that appointment

PP: They can call or they can just walk in.

Pimp: Oh they can do it over the phone as well? Ok and how much is that?

PP: It all depends. Like I said, if they come in for just a consultation, its \$80 which is for birth control. If they wanna full exam, it can go up to 200.

28800

Pimp: Ok and the actual abortions, are there different types?

PP: There's a medical abortion and a surgical abortion. That's a whole different boat that has to be made over the phone. The person that needs the appointment actually has to schedule it. There's a 24 hour message they have to listen to, its required by VA law.

Pimp: uh, which one could they possibly be able to get back to work as fast as possible?

PP: Any time you have an abortion, you should abstain from intercourse for at least a week or two because you can get an infection.

Pimp: Is there something else that they can do?

PP: No...

Pimp: There's nothing else that they can do. Is that just like, vaginal sex or-?

PP: Well I mean, obviously, you can't tell someone not to have intercourse. I mean, they shouldn't do it because it's a better risk of getting infection and obviously you can get pregnant again right away.

Pimp: zBut if there were options?

PP: I mean, to each their own. It's not-

Pimp: To each their own. So they could just do other stuff outside of, but maybe what you're talking about is vaginal-

PP: I wouldn't recommend it, but they can do, I mean, everybody has their own-

Pimp: ok.

30800

PP: I can give you, um, she's gotta come back in her office here, I can give you a pricelist to some of this stuff.

Pimp: Ok, really quick, the girls that don't have the documentation. If they come in here, how can they be able to. 'Cause I don't want them to come in here and get scared as if there's gonna be interference and all that, they not gonna want to come in, which means they not gonna get help, they not gonna be safe.

PP: They have ID?

Pimp: Yeah. They have ID.

PP: A lot of people who don't have documentation there are clinics that they can go to that don't require even a photo ID. So that's not.

Pimp: Really? Do you know of any?

PP: I'm pretty sure the Health Department is one. They have to live in that county though... so,

Pimp: Yeah, yeah

PP: If they live in Fairfax County, they go to Fairfax health department. If they live in Arlington-

32200

Pimp: Yeah we have an address-

PP: Ok. So that's free testing too. So that might be-

Pimp: Ok, and even for the younger girls, they can get tested there too as well, is that correct?

PP: Yeah, nobody's gonna refuse service.

Pimp: Ok. And even here you said they can get the birth control here still. And they can get the testing here as well. But you said for the abortion they would need-

PP: For the abortion they would need the photo ID.

Pimp: Just the photo ID.

PP: And if they're minors they would need parental consent. Like I said, if you bring them to any clinic, if they're, like you said, if they're 13 or 14, there's laws that some things have to be reported. So, not necessarily their status, but-

Pimp: But if a teenager comes in and just says I need to be tested-

PP: Then yeah, yeah.

Pimp: But they just need a photo ID?

PP: Uhuh.

Pimp: Ok so that works.

PP: Ok?

Pimp: Alright. And you had a pricelist?

PP: **Yeah I'll get you a pricelist. Ok?**

Pimp: **Ok. And uh, do you have a card so that I can make sure I know who I talked to?**

PP: **Just step out right here and ill copy it for you.**

Pimp: **Alright.**

35000

PP: Here's this for ya, and my name's on the back of the card and that's the number for the other clinic, ok?

Pimp: Alright, thank you.

PP: You're welcome, take care!

Pimp: Alright, have a good night.
