

# HOW YOU ARE FUNDING ABORTION.

thanks to  
ObamaCare (ACA)

You are paying your taxes.

A portion of your taxes will be given as subsidies to those who normally couldn't purchase healthcare but choose abortion in their new federally-subsidized healthcare plan.

**You get health insurance from your state health insurance marketplace (Exchange).**

*And you live in one of the 27 states or the District of Columbia, which haven't banned abortion from their state Exchanges. Find out which states have banned abortion coverage at: [www.abortionfreehealthcare.com](http://www.abortionfreehealthcare.com).*

**You get health insurance from your employer,** which they choose for you and your family.

Many of the plans in the Exchange will cover abortions. All plans in the exchange will cover potentially abortion-inducing, cancer-causing contraception.

As in the past, you will be able to choose to opt into this insurance and pay a percentage of the monthly premium. It will most likely include potentially abortion-inducing, cancer-causing contraception and abortion, as most plans already do.

If you select a plan with abortion coverage, you will pay a second fee each month on top of your premium just for abortion coverage.

You will not be able to opt-out of the abortion coverage unless you switch to a new health insurance plan that does not include abortions. Obamacare mandates that you are not allowed to know just how much this abortion fee is...Making it a secret.

You will not be able to opt-out of the abortion coverage unless your employer switches to a new health insurance plan that does not include abortions or you opt-out of your employer's chosen plan.

You will have to be a sleuth to figure out which plans actually cover abortion, as Obamacare regulations mandate that abortion coverage can only be mentioned in the "summary of benefits and coverage" when you enroll. **Good luck!**
