

Another Child Killed by Abortion

How Many More???

This little boy was one of several third trimester children found in medical waste bags outside a legal abortion center in Houston, Texas, in late 1986. He was 14 inches long, weighed 2 lbs. 2 oz., and was 30 weeks gestation--7 months old--when killed.

His umbilical cord was ripped from his body, which also detached his penis. The face, feet and hands were found white and bloodless, while the abdomen was severely bruised and bloodied. Both of the child's buttocks were carved off (this technique ensures death by bleeding and also suggests that the child was born still alive).

Twelve seaweed-type laminaria (used to open the mother's cervix) were found in the bag with this child. Discussion with OB-GYNs indicate that 3 to 6 laminaria would be the maximum safe limit for a woman's cervix to endure without damage.

Other severely decomposed babies were found outside the center, having apparently been kept inside for several weeks before disposal.

The gruesome reality is clear--we cannot tolerate "a little bit of abortion," even if this little boy was "only" one of 10,500 third-trimester children (of the 1.5 million) legally aborted last year in the United States.

Abortion is wrong; it is morally wrong. It destroys the life of the child, and enslaves the soul of the mother (and father, doctor, nurse, judge, politician...).

How many more victims...How many more?
